

The Guide to a Chicken King Setup and Construction Costs:

A Typical ideal size for an outlet of 100 square metre will be approximately 1 Million Namibian Dollars excluding VAT. This includes the following:

- Franchise Joining Fee of N\$ 75 000.00
- All Plant & Equipment.
- All training, Owners to Staff.
- Designing and layout.
- Complete Point of Sale solutions, hardware to software.
- Initial promotional materials and marketing to the date of opening and beyond.
- A complete Chicken King Franchise Pack, consisting of the Operations Manual, the business and trade system and support ongoing in all relevant fields needed.

The Capital Invested may change and deviate from the N\$ 1 000 000.00 depending on the size of the outlet, the geographical location, economical factors etc. The Franchisor cannot guarantee the layout costs by any means, until a final quotation has been made.

For a more accurate estimate, full plans of the proposed outlet should be submitted to the Franchisor. Thereafter we will work towards a final quotation.
